

SAP BUSINESS ONE TRAINING

Our Roadmap

Illumiti utilizes a training track matrix tool that enables all parties involved in the ERP project to keep track of training of all users. It is a simple matrix that identifies all the users, the roles they will complete and the business processes they should be trained on. This should be used in conjunction with the Swimlane Visio Diagrams determined in the Blueprint document which was signed off by the customer. This tracker will identify potential issues such as missing business roles, not enough users or licenses available and unaccounted for business processes as soon as possible. This track will allow the trainer to properly structure training sessions and ensure the proper people are present.
