Manufacturing

SSI Schaefer

SSI Schaefer is one of the world's largest total solutions providers and component manufacturers. They provide automated systems, storage, workstations, logistics software and waste technology.

Illumiti's ability to understand our requirements and specific business processes was instrumental in their selection.

Before: Challenges and Opportunities

- Current software couldn't sustain the processes resulting in the use of a numerous spreadsheets
- Software could not provide an "as of date" overview of the financial position of the company without closing all pending transactions
- Needed a system that would provide detailed analytics to drive smarter decisions
- This was also an opportunity to invest in HR and Project Management Add-ons

Why SAP and Illumiti

- Illumiti's ability to understand our requirements and specific business processes was instrumental in their selection
- The ability to run an enterprise wide SAP solution designed and priced specifically for small-to-medium sized organizations

- Illumiti's deep industry expertise, proven track record and ability to provide a plethora of references solidified their selection
- Built in reporting with real-time analytical capabilities leading to more business visibility

After: Value-Driven Results

- Data transparency, real-time access, and ad hoc reporting through SAP Business One for better decision making
- User friendly solution that provided detailed feedback to model organization growth and track orders
- Relationship mapping linked invoices with open orders, which delivered real time progress updates
- Utilization of accounting, inventory, sales and analytics in SAP solutions
- Future integration with Concur & Salesforce to match planned growth across Canada
